# The Timeline of the Middle Ages <br> (The Ages between Alpha and Omega) <br> 7/20/2022 

Name<br>(Age in Years)

-------
Date in Years from Adam

Note: After the Exodus, the Bible does not give exact dates of birth as in Genesis. But according to secular chronology, Moses left Egypt about 1446 B.C. Since Herod the Great died about 4 B.C., Jesus would have to have been born sometime close to 4 B.C. Since Jesus lived for $331 / 2$ years, He would have died around 30 B.C.

So if we add $33+1446$ we get 1479 , which would be the total years from the Exodus to the cross, according to secular chronology. Then 2805 is the number of years from the creation of Adam to the Exodus, according to Biblical chronology. If we add $1479+2805$ we get 4284, which represents the approximate time in years from the creation of Adam to the cross. If we then subtract 30 from 2022, our current year, we get 1992. And if we then add $1992+4284$, we have the current elapsed time of 6276 years, approximately, from the creation of Adam to the present day.
